Sprint Retrospective, Iteration #2

Task	Task assigned to	Done (y/n)	Notes
Plugin should support relative paths containing ../	Irem	y	
Add support for links with whitespace	Irem	y	
Implement basic functionality of Core module	Tommaso, Tudor	y	Core module is now LinkUpdater
Add buttons to update links	Ceren	y	
Implement functionality for tracking directory paths	Ceren	y	
Format new links according to the formatting of their original link	Tommaso	y	
Functionality for getting the web reference type	Tudor	y	
Add functionality for running git commands on specific branches	Tudor	y	
Implement functionality for retrieving versions of a file between two commits	Irem	y	
Make tracking links to files more robust	Tudor	y	

Main Problems Encountered

Problem 1:

Description:

When implementing the LinkUpdater it's been multiple times difficult to find proper documentation and information on how to use the IntelliJ platform API.

Adjustment for next Sprint:

Make more use of the Jetbrains support forum
